Credit Issuing: Stand Out from the Crowd

Capitalize on the growing business opportunity in credit around the globe with a differentiated solution. i2c's secure and fully-featured credit capabilities include credit decisioning support, fraud prevention, print and plastics, fulfillment and collections. Retail consumer cards, SMB programs and commercial cards are also fully supported.

Prepaid Solutions: Imagine Any Use Case

i2c's platform transcends any use case, to include airline, travel, payroll, general purpose reloadable (GPR), expense management, and virtually any need that you can conceive. Drive reloads, transactions and 'top of wallet' status.

Agile Processing: A Multi-Function Payments Platform That's Built For A Future That You Can Predict

One Global Platform

All functions are completely integrated into one single, reliable and scalable cloud-based platform that issuers control

One Single Code Base

All program features are available anywhere and at any time: securely, flexibly and reliably

Component Design

Choose from a vast library of technology components to customize and scale payment solutions

Powerful APIs

Code with ease, design and deliver on any functional need

Peak Performance

i2c's platform averages less than 250 ms per transaction and has experienced zero outages over the past 20 years

Fully Certified

The i2c platform is SSAE18 SOC1 & SOC2 compliant, ISO 31000:2108, ISO 27001:2013, and PCI-DSS. Certifications with Visa, Mastercard, American Express, Discover and UnionPay allow direct card network connectivity.

Digital Framework

Toolkit includes intuitive and customizable interfaces for program managers, consumers and partners

Engagement

Real-time and fully integrated loyalty, rewards and campaign tools help deliver better consumer experiences

i2c: Support That Completes Your Market Success

With i2c's "whole product" approach, issuers can use some or all of i2c's agile payment services to get to market quickly. From call centers with multi-lingual support to complete program management, you can leverage as much or as little capability as you need.
